

## Sunteca Making a Difference

Green, eco, environmentally friendly – whatever your shade of green, Sunteca vinyl louvers are now even better for you, your family, your home and the environment.

The quality of the engineered ingredients we use and the high performance of our products have been the benchmark for decades.

Make Sunteca vinyl louvers your green option whatever color you choose.

Sunteca Eco-Choice™ louvers, awarded “Best New Technical Innovation” product for 2009 by the Window Coverings Manufacturers Association (WCMA 2009) is a product that meets the latest standards in renovation or construction and may qualify towards the LEED point system.

Eco-Choice™ louvers are designed for residential or commercial applications and are made containing recycled vinyl materials; louvers are available with 25% or 50% recycled content. The louvers are doubled sided-embossed, reversible and available in three neutral colors. As part of our “green initiatives”, Sunteca wishes to offer you the customer, products that enable you to improve our environment and consumer living standards. Sunteca is proud to be the first North American window covering vertical louver extruder to provide “green” louver products to all its customers.

Planning for the generations ahead
